What is the Inside Wire Protection Plan?

The Inside Wire Protection Plan protects you from large repair bills if you should have communications wiring problems inside your home or business. While TDS® takes care of all telephone wiring between our office and your home or business, a 1987 FCC law makes you, the customer, responsible for wires and jacks within your home or office. If you're not on the plan, repairing that inside equipment can cost you a lot of money.

For a small monthly fee, we'll repair or replace damaged wiring quickly and without additional charges. The Inside Wire Protection Plan takes a big load off your mind for a very small price—just pennies a day!

Benefits of the Plan

- Nominal monthly charge for otherwise costly repairs*
- Repair of all inside wire and replacement of standard jacks at no additional cost
- TDS' guarantee of quality work at fair prices

What repairs does the Inside Wire Protection Plan cover?

The plan covers the telephone broadband wires and jacks that are inside your home. Once you sign up for the plan, we'll diagnose problems and repair damage without charging you for the service call.

The plan does NOT cover:

- New jacks, rewiring, first-time installation of telephone/broadband wiring, component wiring between customer owned TV or PC equipment, OR if your wiring was intentionally damaged or negligently installed.
- Devices such as modems, fax machines, security systems, satellite equipment, video equipment or cable TV converters that are causing interference on your phone line.
- Replacement of installed wiring that does not meet accepted industry standards, as well as use of improper wire, such as doorbell or speaker wire.

How do I sign up?

To enroll in the Inside Wire Protection Plan, call 1-888-CALL-TDS. You'll be covered as soon as we receive your request, and you may choose to cancel at any time.
