

## TDS Online Backup Upgrade

You will need to uninstall the current TDS Backup Online program. To do this you will follow one of the following steps depending on what version of Windows you have.

### Windows XP

Click start

Click on "control panel"

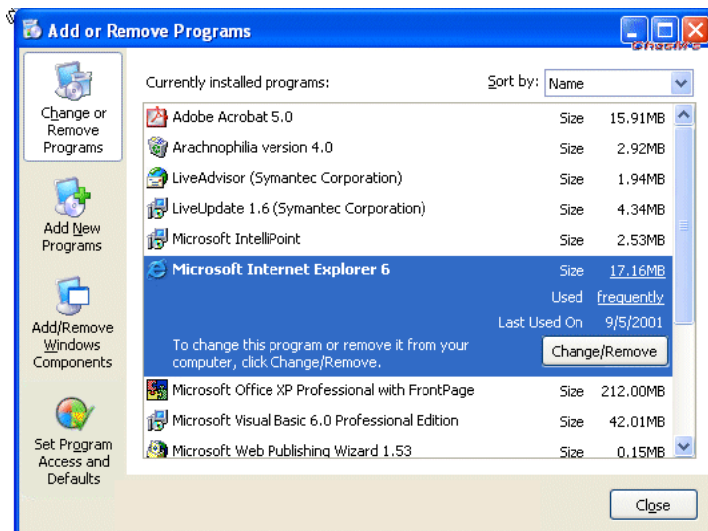

Click "Switch to Classic View" in the left corner of the screen (if the choice states "switch to Category View" you are already in Classic View)

Click "add or remove programs"

Find the program called "Carbonite"

Click on Change/Remove for the Carbonite program.

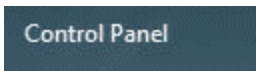

Continue with the uninstall of Carbonite.

# Windows Vista/7

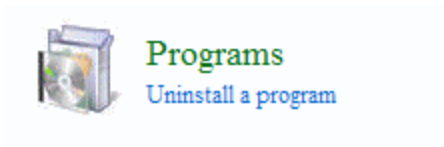

Click Start

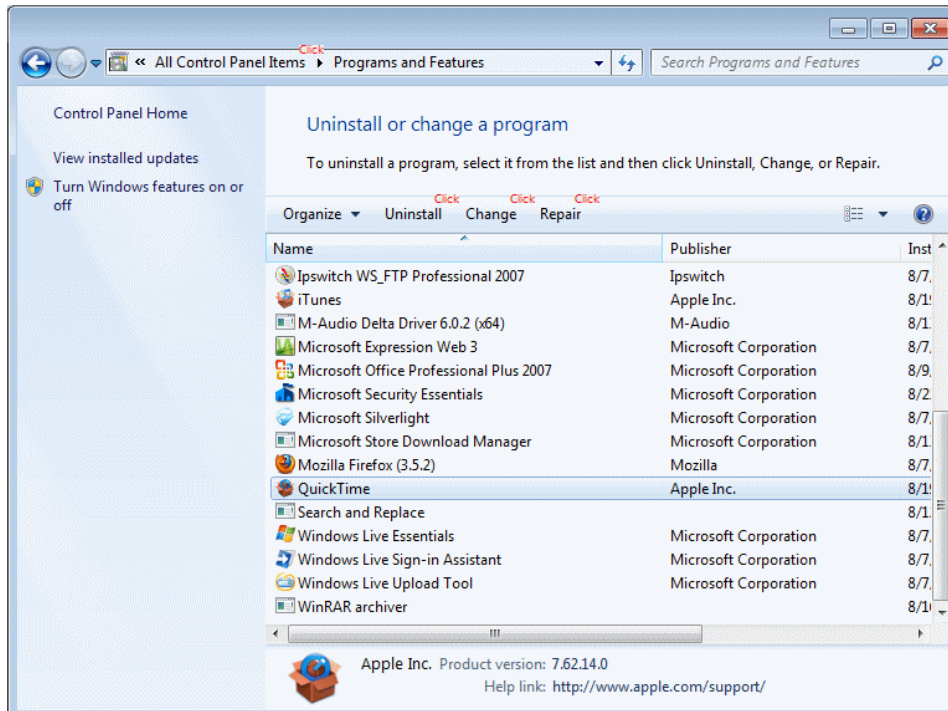

Click Control Panel

Under programs Click “Uninstall a program”

Find a program called “Carbonite”

Click on Uninstall for the Carbonite program.

Continue with the uninstall of Carbonite.

# Download the New TDS Backup Online

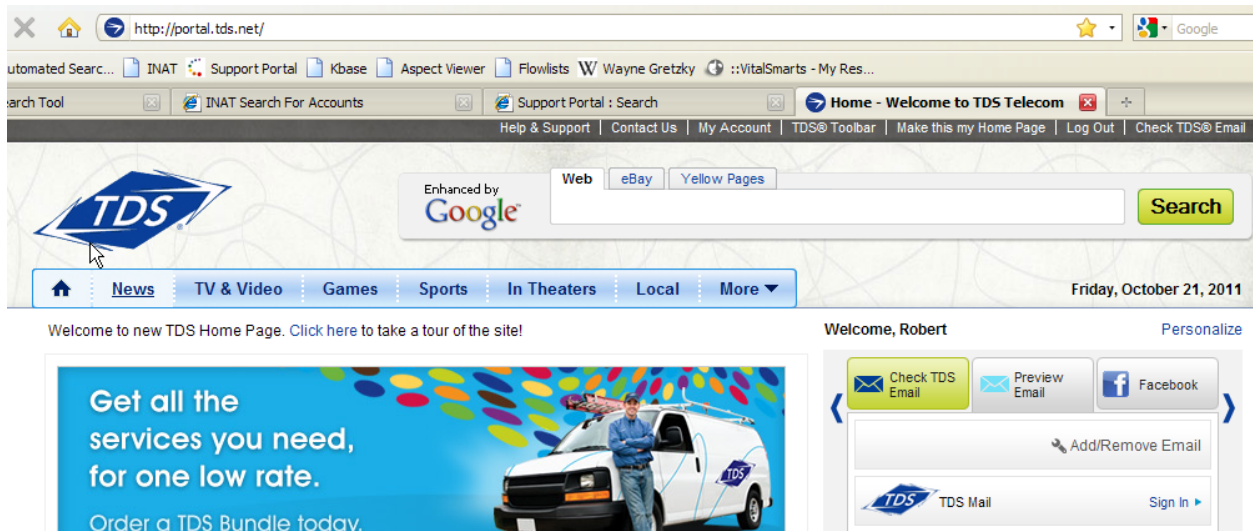

Open up your web browser (Internet Explorer, Firefox, etc.)

This screen should have your subscription key already entered

Click "Back up Files

Click next

The screenshot shows a software window titled "TDS BACKUP ONLINE". The window has a standard Windows-style title bar with minimize, maximize, and close buttons. The main content area is divided into a progress bar at the top with five steps: "User name", "Backup name", "Content", "Time limit", and "Summary". The "User name" step is currently active and highlighted in blue. Below the progress bar, there is a shield icon with a green checkmark and a red 'X' over it. The text reads "User name" followed by the question "Have you used TDS Backup Online before?". There are two radio button options: "No I have not. I want to create a user name now." (which is selected) and "Yes, I have. I want to log in with my user name." Below these options, a message states: "Your license does not have any user IDs available. Please create a new user ID." At the bottom of the window, there is a footer with "Protection by F-Secure" and a logo, and two buttons: "Next >" and "Cancel".
